Amazon Quick – Lab Access Guide

Guide Target Personas:

- Bootcamp attendees

A Step-by-Step Guide to Setup and Access Amazon Quick

Before You Start

Make sure you have:

- A web browser (Chrome, Edge, or Firefox)

Getting Started with Amazon Quick

Amazon Quick is an agentic AI-powered digital workspace that helps you quickly answer questions at work and turn those answers into action — from research and data analysis to workflow automation. Students will be using it in their hands-on labs for their AWS-MLU Agentic AI course.

Guide to Accessing Amazon Quick Free Tier

Overview

Amazon Quick offers a **Free** plan that lets anyone get started within minutes — no AWS account required. You can sign up using your email or social credentials and begin using AI-powered assistance immediately.

How to Sign Up

1. Visit the Amazon Quick sign-up page and click on **Try Quick for free** button.
2. Create an account using your **email address** or **social credentials** (e.g., Google, Apple)
3. Confirm your email and complete the registration

4. You're in — no AWS account or credit card needed
5. If you're prompted to download the Quick desktop app, choose "Continue on web for now" instead.

What's Included in the Free Tier

Reader Capabilities

- Chat with AI agents
- Create apps
- Upload files for conversational context (up to 20 files per conversation)
- Create charts and visualizations directly from chat
- Attach open browser tabs as context (via browser extension)
- Highlight and right-click text on web pages for instant analysis

Author Capabilities (Free Tier)

- All Reader features
- Create datasets
- Create custom AI agents
- Basic sharing

Admin Capabilities (Free Tier)

- All Author features
- Manage users and subscriptions

How to Access Amazon Quick

Web App

1. Sign in at the Amazon Quick web app
2. Use the left navigation panel to explore features
3. Access: New chat, Search, Spaces, Research, Chat agents, and more under the "More" menu

Free Tier Limitations

Feature	Free Tier	Requires Upgrade
Chat with agents	YES	—
Upload files	YES	—
Create visualizations	YES	—
Create datasets	YES (Author)	—
Create agents	YES (Author)	—

Collaborative Spaces	NO	Plus and above
Quick Research	NO	Plus and above
Flows (automation)	NO	Plus and above
Artifact generation (DOCX, PPTX, etc.)	NO	Plus and above
Quick Sight (BI dashboards)	NO	Professional+
Quick Automate	NO	Professional+

Upgrading from Free

If you need more capabilities, Amazon Quick offers:

- **Plus** — Adds Spaces, Flows, Research, artifact generation, web search, and a 30-day free trial
- **Professional** — Adds Quick Sight dashboards and Quick Automate (requires AWS account)
- **Enterprise** — Full platform with enterprise admin tools and governance (requires AWS account)

Tips for Getting the Most Out of the Free Tier

- **Use the browser extension** — Attach open tabs, highlight text, and chat with agents while you browse
- **Upload files for quick analysis** — Drag spreadsheets or documents into chat for instant Q&A
- **Create a custom agent** — Configure an agent with persona instructions tailored to your workflow (via web app)
- **Try creating datasets** — Connect to your data and explore it with natural language questions
