

MACHINE LEARNING UNIVERSITY

Creating your Study Research Plan using Quick

A Step-by-Step Guide for College Students – No Coding Required!

What You'll Build

In this lab, you'll discover how to use Amazon Quick Research—an AI-powered research agent—to create a personalized study plan based on your field of study. Quick Research combines information from the internet and your uploaded materials to deliver expert-level insights in minutes.

Before You Start

Make sure you have:

- ☒ Access to Amazon Quick (with an AWS account)
- ☒ A modern web browser (Chrome, Firefox, Safari, or Edge)
- ☒ Information about your field of study (major, courses, learning goals)
- ☒ Optional: Course syllabi, degree requirements, or study materials in PDF, Word, or PowerPoint format

 **Tip:** Quick Research works best when you provide specific details about your academic goals and timeline!

Step 1: Open the Amazon Quick Web App

1. Open your browser and go to your Amazon Quick web app URL.
2. Log in with your account credentials.
3. You'll land on the **Amazon Quick homepage**.

 **Tip:** If you've been using the browser extension, click "**Go to web app**" from the dropdown menu at the top of the side panel.

Step 2: Access the Space you've create in Module 1 – Agentic AI Essentials Lab 1.1

1. Click on the **navigation panel** on the left side
2. Select **"Spaces"**
3. Locate the Space you created in Lab 1.1 (e.g., "My Computer Science Study Materials" or your custom name)
4. Click to open your Space
5. Review the files you've already uploaded:
 - Course syllabi
 - Degree program requirements
 - Lecture notes or textbook chapters
 - Previous study guides
6. **(Optional)** Add any new materials relevant to creating your study plan by clicking **"Add files"**

 **Tip:** Since you already set up your Space in the previous lab, you can skip directly to using it! However, consider adding any semester-specific materials like updated syllabi or new course requirements to make your study plan even more personalized.

Step 3: Navigate to Quick Research

1. From the Quick home page, click on the **navigation panel** on the left
2. Select **"Research"**
3. Click the **"New Research"** button

 **Tip:** Quick Research is different from regular chat—it's designed for deep, comprehensive analysis that takes several minutes to complete.

Step 4: Define your Research Objective

1. In the research objective field, enter a clear, specific goal. For example:

Example Research Objectives:

- "Create a comprehensive 15-week study plan for a Computer Science major focusing on data structures, algorithms, and software engineering fundamentals"
 - "Develop a semester study schedule for a biology pre-med student balancing organic chemistry, anatomy, and research lab commitments"
 - "Design a study plan for mastering machine learning concepts including supervised learning, neural networks, and practical applications"
2. Be specific about:
 - Your field of study

- Time frame (semester, quarter, specific number of weeks)
- Key topics or courses
- Any special goals (exam prep, project deadlines, skill development)

💡 **Tip:** The more detailed your objective, the better your results will be!

Step 5: Connect your Space as a Knowledge Source

1. Below the research objective field, look for "**Knowledge sources**" or "**Add sources**"
2. Click to expand the sources section
3. Select "**Spaces**"
4. Choose the Space you created in Step 2
5. Optionally, enable "**Search the web**" to include current information from the internet

💡 **Tip:** Combining your personal materials with web search gives you the most comprehensive study plan!

Step 6: Configure Research Settings (optional)

1. Review the research settings:
 - **Depth:** Choose "Comprehensive" for detailed plans
 - **Focus areas:** Add any specific topics to emphasize
2. Leave default settings if you're unsure

💡 **Tip:** For your first research, stick with defaults—you can always run another research with different settings!

Step 7: Launch your Research

1. Review your research objective one more time
2. Click "**Start Research**" or "**Generate**"
3. Watch as Quick Research develops a research plan
4. The agent will begin conducting in-depth research (this takes 3-10 minutes)

💡 **Tip:** You can navigate away and come back—Quick Research runs in the background!

💡 **Tip:** Refresh your browser window for time to time to check if the plan is already finished

Step 8: Review your Study Plan

Once complete, your research report may vary but it should include some of the features below.

What to Look For:

- **Executive Summary:** Overview of your study plan approach
- **Weekly/Topic Breakdown:** Detailed schedule with learning objectives
- **Recommendations:** Textbooks, online courses, practice materials
- **Time Management Tips:** How to balance different subjects
- **Assessment Strategies:** How to track your progress
- **Citations:** Sources used to create your plan

 **Tip:** Scroll through the entire report—key insights are often in the detailed sections!

Step 9: Test and Refine your Study Plan

Use this table to evaluate your study plan:

Evaluation Criteria	What to Check	Action if Needed
Realistic Timeline	Does the weekly schedule fit your available study hours?	Run new research with adjusted time constraints
Topic Coverage	Are all your courses/subjects included?	Add missing topics to research objective and re-run
Resource Quality	Are recommended resources accessible and appropriate?	Check citations and verify recommendations
Flexibility	Does the plan account for exams, projects, breaks?	Note areas to adjust manually

 **Tip:** If can highlight parts of the research plan text and, when you finish, ask Quick to update your research plan based on your comments.

Step 10: Export and Use your Study Plan

1. Click **"Share"** menu at the top of the research report
2. Choose your format:
 - **PDF:** For printing or annotating
 - **Word:** For editing and customizing
 - **Share research:** To collaborate with study partners
3. Save to your preferred location

💡 **Tip:** Click at the Summarize button to generate a summary of your study plan and post it in your study space for daily reference!

Step 11: Share with Study Partners (Optional)

1. Click the **"Share"** button in your research report
2. Choose **Share research** option, add the e-mails of people you want to share the link with.

💡 **Tip:** Collaborating with classmates? Share your research so everyone benefits from the comprehensive plan!

Step 12: Discuss and Compare

Discussion Prompts for Your Study Group:

- What surprised you most about the AI-generated study plan?
 - How does your plan compare with classmates in the same major?
 - What adjustments will you make based on your personal learning style?
 - Which recommended resources are you most excited to explore?
 - How will you track your progress against this plan?
-

Quick Recap

Step	What You Did
1-3	Set up Quick Research
4-6	Defined your research objective and connected knowledge sources
7-8	Launched the AI research agent to create your study plan
9-10	Reviewed and evaluated the comprehensive study plan
11-13	Exported, shared, and discussed your personalized plan

Troubleshooting: Common Beginner Issues

✗ Problem: Research results are too generic or don't match my specific courses

✓ Fix:

- Make your research objective more specific—include exact course names and topics
- Upload more detailed materials (syllabi, course descriptions) to your Space
- Re-run the research with refined objectives

✗ Problem: The study plan suggests too many hours per week

✓ Fix:

- Add time constraints to your research objective: "Create a study plan requiring no more than 20 hours per week"
- Specify your other commitments in the objective

✗ Problem: Research is taking too long or seems stuck

✓ Fix:

- Wait at least 10 minutes—comprehensive research takes time
- Check your internet connection
- If it exceeds 15 minutes, refresh and try again with a simpler objective

✗ Problem: Recommended resources aren't accessible to me

✓ Fix:

- Add to your objective: "Focus on free and open-access resources"
- Specify your institution: "Include resources available through [Your University] library"

✗ Problem: The plan doesn't account for my learning style

✓ Fix:

- Add learning preferences to your objective: "I learn best through hands-on projects and visual materials"
- Customize the exported plan manually to fit your needs

✗ Problem: Can't find the Research feature

✓ Fix:

- Make sure you're in the Quick web app (not the Word add-in)
- Look for "Research" in the left navigation panel
- Verify your account has access to Quick Research features

✗ Problem: My Space files aren't being used in the research

✅ **Fix:**

- Confirm files finished uploading (check for completion status)
- Verify you selected the correct Space in Step 6
- Ensure files are in supported formats (PDF, Word, PowerPoint)

❌ **Problem:** Research report is too long to read

✅ **Fix:**

- Start with the Executive Summary section
- Use the table of contents to jump to relevant sections
